Study Title: Creating Novel Virtual Reality Interfaces for Teaching Computer Architecture

Researcher: Priyansh Nayak

Supervisor: Gareth Young

School: School of Computer Science & Statistics, Trinity College Dublin

Programme: Master's of Computer Science - Augmented and Virtual Reality

Draft Recruitment Email

Dear Participant,

You are invited to take part in a research study exploring the use of virtual reality for teaching computer architecture concepts.

The study involves attending a single session of approximately 45 to 60 minutes. During the session, participants will use a prototype virtual reality learning environment, complete a small number of guided learning tasks, and answer short questionnaires about understanding, engagement, and usability. Participants may also provide brief written feedback on their experience.

Participation is entirely voluntary. You do not have to take part, and you may withdraw at any time without penalty. If you experience any discomfort while using the VR headset, the session will stop immediately.

If you are interested in taking part, please reply to this email and you will be provided with further information, including the Participant Information Leaflet, before any consent is obtained.

Thank you for considering this invitation.

Best regards,

Priyansh Nayak
